

2008-9 Statistics Tables – Explanatory Notes and Commentary

Tables: Attached are summary details of the contacts and complaints about your Council that the SPSO received and determined in 2008-09. Table 1 details total contacts (by our subject categories) received for your Council for 2007-08 and 2008-09, alongside the total of local authority complaints for these years. We recorded 27 complaints about the Council, compared to 23 in the previous year. Table 2 shows the outcomes of complaints determined by the SPSO in 2008-09.

Graphs: The first graph provides a visual representation of the information from the right side of Table 1. You'll see that in 2008-09 your Council was above the national average in terms of complaints about education, legal & administrative issues, environmental health & cleansing, and personnel. Your Council was below the average for complaints about planning and social work. We received more complaints for your Council about legal & administrative issues and education, and no complaints about roads & transport, compared to the previous year.

The second graph shows for each Council the percentage of complaints that we received and determined as premature, against the national average in 2008-9 (60%). We consider a complaint to be premature when it reaches us before the complainant has been through the full complaints process of the organisation. The graph does not reflect the number of premature complaints that we received about your Council, but shows how your Council, proportionately, compares against the average for Scottish local authorities. Your Council is number 24 on the graph, below the average. You'll see from Table 2 that the actual number of premature complaints for your Council was 13 out of a total of 26 complaints determined (50% of the total for your Council). This was a decrease on the previous year's figure of 18 out of 26 (69% of the total for your Council).

NB We don't adjust any of our figures to mitigate the impact of housing stock transfer. It's evident, however, that there's a tendency for authorities that retain housing stock to receive more complaints and to fall higher within the prematurity graph than those that have undertaken stock transfer. This is to be expected given that housing complaints are usually the largest category of complaint and that there's a disproportionately high incidence of prematurity with housing complaints.

Complaints and Recommendations Reported to Parliament

We discontinued one complaint about your Council at the investigation stage. We did not report on this complaint.

.....

We hope that you find this summary information useful. If you have any enquiries about the statistics, please contact Annie White, SPSO Casework Knowledge Manager, on 0131 240 8843 or email awhite@spsso.org.uk. Fuller statistical reports are available on our website at: <http://www.spsso.org.uk/statistics/index.php>.
